Greetings

Kindly complete the below Internship Task:

1. Integrate a chatbot feature where users can ask their questions directly to the chatbot.
It should answer all programing related questions
Authenticate with OTP before asking questions

2. Create subscriptions using a payment gateway (like stripe, razorpay) to post questions in stackoverflow.
Testcase: Free Plan can post only 1 question a day, silver plan will be ₹100/month which can post 5 questions a day and gold plan can post unlimited questions and priced at ₹1000/month.

3. Create a social media community where people can share images, and videos and get likes and shares and also be able to add friends and remove friends.
Testcase: Users can share their programming experience here using text, photos, and videos which can be viewed by others. Users can search, like, unlike, remove, add their friends.

Note: Make the entire website responsive on all mobile devices including tablets

Stipend and Internship Certificate:
The tasks should be completed within 15 days from this date to get a stipend of 3k along with an internship certificate. For an internship certificate alone you need to submit at least 1 task and there is no deadline.

Instructions:

Assignments should be implemented along the completed website which is in the course.
You need to share the netlify/vercel URL of the hosted website.
Mentor support will not be available during the assignment.

Thanks,
Team NullClass
